HYUNDAI OE has changed the design of water pump on the early car models.

HYUNDAI stopped the supply of the old waterpump, equivalent to VKPC 95872 which is used in applications from year 2000-2006. HYUNDAI recommends replacing the old waterpump to the new evolved design + fitting a new pulley, ensuring the proper belt alignment and fitting is maintained.

To follow car makers' specifications, SKF offers the equivalent waterpump together with the pulley to cover for the old application as per Hyundai instructions.
