

SMPE – Water Cooled EGR Valves for VAG Applications.

<u>Intermotor Part No's.</u>	<u>Lemark Part No's.</u>	<u>Fuel Parts Part No's.</u>
14488	LEGR147	EGR347
18022	LEGR235	EGR381
18023	LEGR236	EGR382

IMPORTANT

- Ensure vehicle ECU has been updated to the latest software issue (can check on vehicle Manufacturer website).

After fitting:

- Use appropriate diagnostic equipment to clear any fault codes.
- Switch off ignition for at least 30 seconds, then start engine and allow to idle until it reaches normal operating temperature.

The new EGR valve base settings should now have been learned. The engine may run slightly unevenly for about 50 miles, until the ECU fully learns the adaptive parameters of the new EGR valve.
