

## **BULLETIN 0008**

### **Citroen, Fiat & Peugeot 1.8, 2.0, 2.2 litre petrol engines**

#### **FWP 1937 & FWP 2125**

We are aware that there is a possibility that vehicles could be fitted with impellers of 2 differing sizes.

It is important to ensure that the correct pump is selected prior to installation to prevent the impeller fouling the pump back-housing. Conversely fitting the pump incorrectly with the small impeller is likely to lead to overheating as the clearance between impeller and back-housing will be too great.

**FWP 1937 has 61mm Impellor**

**FWP 2125 has 55mm Impellor**

**Please check before installation**
