

Replacement of T5167 with T1449

Following a supersession on Citroen & Peugeot side, Pagid will harmonise the references T5167 and T1449 and only keep T1449 in their portfolio. This also means that T1449 will be able to cover all applications of T5167.

Even though the parts are slightly different in height there will be no difficulties during installation and operation as Pagid follows the OES replacements.

As usual existing stock of T5167 can be sold and installed without any problems.
