

# PRODUCT INFORMATION SHEET

## FBG068 BRAKE GREASE

A superior quality adhesive non melting metal free grease with a high viscosity base oil subject to applications within elevated temperatures. Base oil viscosity selected to tune-out frequencies found in brake applications. The consistency of the grease remains stable through a very wide temperature range. Excellent for use in many automotive brake applications to help prevent brake noise and squeal.

### OUTSTANDING FEATURES :

- Copper Free brake grease.
- Contains no solid constituents.
- Anti-lock approved.
- Facilitates parts assembly.
- Reduces brake squealing and noise.
- Has numerous applications in disc and drum brake assemblies on pins, guides, shims, behind pads.
- High water resistance.
- Wide temperature range.

**Multi-Purpose brake grease**  
**Very Long Lasting**  
**Non-Drip, Non-Melt**  
**Corrosion Protective**  
**Tuned for brake noise and squeal**

Apparance :	Smooth adhesive grease
Colour :	Brown
NLGI :	No 2
Thickener :	Inorganic type
Base Oil :	Blend of solvent-refined mineral oils
Base Oil Viscosity :	Selected to dampen frequencies found in brake applications.
Copper Corrosion (IP112)	1b.
Application Temps :	-40 to +180 degC.
