

Assortment, squeeze connectors

This range contains 190 connectors for processing cable cross-sections from 0.1 - 6 mm². Depending on the application and the requirements for the connection (e.g. tightness), you can choose between different connector types. Whether uninsulated, insulated or with heat shrink

tubing, every type of butt connector is included here. For processing with a hot air gun, solder connectors are also included, which can be used as butt and branch connectors. The refill packs fit into the respective compartment in the box.

Plug Type:

T-Union
Butt Joint
Shrink Connector
