

SOLUTIONS FOR COMMERCIAL VEHICLES

DISC BRAKE PADS

HEAVY DUTY

HD PRO

- Premium OE quality material
- UN ECE R90 certified material
- The best friction solution for stop and go applications
- Excellent braking efficiency
- Quiet, safe, and reliable
- Advanced mechanical retention system
- Exceptional durability, stable performance & long life formulation under all temperatures
- Low aggressiveness to the brake disc
- Large V-groove prevents bridging of wear debris under heavy duty conditions
- High structural integrity and mechanical resistance
- Friction coating to improve initial performance

STANDARD DUTY

**CV
advanced**

- High benefit-cost ratio
- UN ECE R90 certified material
- High and stable performance
- Advanced mechanical retention system
- Excellent braking recovery
- High structural integrity
- Suitable for Trucks, Trailers, and Buses
- Friction material developed for commercial vehicles
- High durability
- Friction coating to improve initial performance

LIGHT DUTY

PLUS

- Performance and stability
- UN ECE R90 certified material
- Advanced mechanical retention system
- Good recovery under various temperature conditions
- Good structural integrity and mechanical resistance
- Suitable for trucks and trailers
