TSB-204

Transit Kit Suitability

It is important to check that you have the correct single mass flywheel (SMF) prior to fitting this kit. This can be done by measuring the step of the flywheel and checking that it corresponds to the kits listed below:

For a flywheel step of -25.4mm, the correct kits are KFD26020/KFD26420

For a flywheel step of -22.9mm, the correct kits are KFD26037/KFD26437

If these kits are fitted to the incorrect flywheels, the clutch will not function correctly.
This is not a warrantable issue.
