Checking Commercial Flywheels with Various Sensor Types.

It is critical that all commercial flywheels are inspected thoroughly prior to fitting and fitting the incorrect flywheel will cause the engine not to start.

The following needs to be checked:

- Number of Sensor Pins, Sensor Holes or Sensor Teeth/Marks
- The position of the Sensor Pin, Sensor Holes or Sensor Teeth/Marks

Sensor Pin Type

Sensor Hole Type

Sensor Teeth/Mark Type

Note: Fitting the incorrect flywheel to the vehicle is not a warrantable issue
