

## PRELINE CLASSIC PRE- FILTER KIT CONTENTS:

Example of PreLine Classic Kit for Isuzu D-Max / MU-X

## PRELINE CLASSIC PRE-FILTER KIT BENEFITS:

- ➔ 30 micron element
- ➔ 100% water separation efficiency (based on 150µm droplet size)
- ➔ 98% particle separation (based on 30 micron particles)
- ➔ Reliable protection from corrosion and abrasion
- ➔ Clear Bowl to check the separated water
- ➔ Simple spin-on style filter

**THE FIRST LINE OF DEFENCE  
FOR YOUR DIESEL FUEL  
INJECTION SYSTEM**

## PROTECTION AGAINST WATER AND PARTICLE CONTAMINATION

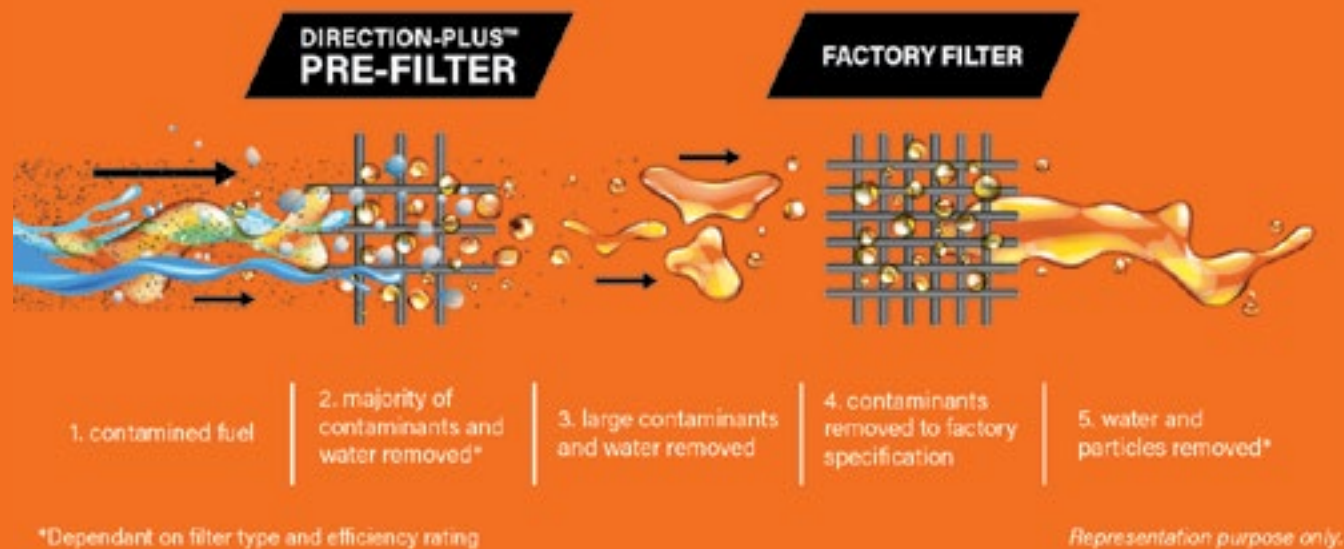

**Direction-Plus™ PreLine Classic** is a pre-filter system for diesel fuel systems designed specifically to cope with extreme weather conditions and poor fuel quality, ensuring a **high degree of water separation and particle pre-separation.**

The **PreLine Classic** kit includes all the contents needed to install the pre-filter into your vehicle. It also contains a **clear bowl** that allows to visually inspect the pre-filter for separated water and drain it if required.

With a **water separation efficiency of 100%** (based on 150µm droplet size) and a long service life, the PreLine Classic pre-filter meets the specifications set by leading manufactures of diesel fuel injection systems. The **PreLine Classic system** provides protection for all modern diesel high-pressure injection systems, reliably **protecting the fuel system from corrosion, abrasion and the frequency of repairs reduced.**

## HOW PRELINE CLASSIC PRE-FILTER WORKS
