

COMMON RAIL DUMMY REGULATOR KIT

Reference : AC 0803

Item name	COMMON RAIL DUMMY REGULATOR KIT
EAN code	3700461498596
Intro	Allows you to check the status of the high-pressure pump regulator.
Text	This device is to be used in combination with the digital pressure tester and the high pressure fuel kit. With this kit, you will be able to bypass the pump regulator to measure pressure and diagnose any regulator or pump problems. After observing the low pump pressure: simply remove the original pressure regulator and select the correct bypass regulator to bypass it and seal the port. If the pressure returns to normal, the regulator will cause a loss of pressure. The regulator is therefore to blame. If the pressure remains too low, the pump is defective. This test is recommended by manufacturers of high pressure pumps. The kit includes 8 different dummies to seal all regulator ports.
Warranty period	2 years
Fuel type	Diesel
