H 11 006 z: Guidance for Installation

1. Align filter element in cover centrally and straight
2. Snap element into cover by pressing moderately on upper end plate (do not use force / listen for a click)
3. Lubricate white silicone seal on filter element
4. Fit new O-Ring on housing cover and oil slightly
5. Screw down housing cover with element in housing as far as it will go and tighten to 40 Nm
