

Replacement of T1688 (WVA 24529) with T2456 (WVA 25087).

Pagid aims to streamline the designation from T1688 to T2456.

Given the identical nature of the brake pads we can ensure seamless assembly and operation.

This consolidation extends coverage to a broader range of vehicles under a singular reference, namely T2456 which comes with drill holes in the plate and therefore is able to cover applications of both part numbers.

T1688**T2456**

The current inventory of T1688 can be effortlessly marketed and sold without any complications.
