

Cooling system vacuum filling device: TOOL BOX W02

TOOL BOX W02 contains a high-quality vacuum filling device. This enables the cooling system to be checked for leaks quickly and easily after repair and then refilled without entrained air bubbles. To do so, the hose system creates a vacuum, meaning that the cumbersome process of jacking the vehicle up, running the engine until hot and then topping up is no longer necessary. Simply connect it up, fill and you're done. This kit therefore saves a lot of time in a busy workshop and is the ideal complement to TOOL BOX W01.
