

PRODUCT SHEET

ARTICLE NUMBER: GAT4485

DESCRIPTION: 1.0L to 1.4L Petrol Chain Twin Camshaft Engine Setting and Locking Tool Kit

INTRODUCTION

GAT4485 engine setting and locking timing tool kit is used for the 1.0L, 1.2L & 1.4L twin camshaft chain driven petrol engines on various Opel, Suzuki and Vauxhall models.

This tool kit includes the camshaft setting plate to set the twin camshafts in their correct position and is inserted at the rear of the camshaft. The timing disc position gauge is required to set the correct position of the timing sensor disc on the inlet camshaft sprocket and a locking pin to lock the crankshaft. The tensioner retaining pin is used to hold the tensioners piston in the retracted position, releasing system tension from the guides & chain, enabling easier removal and installation of the timing drive system.

IMPORTANT: To ensure the engine timing is set correctly, all the tools in the **GAT4485** kit should be positioned correctly on the engine.
