

PRODUCT SHEET

ARTICLE NUMBER: GAT5259

DESCRIPTION: 1.2L EB2 PureTech Petrol Engine Camshaft Sprocket Holding Tool

INTRODUCTION

GAT5259 camshaft sprocket holding tool is used on 1.2L 3-cylinder Euro 6 PureTech EB2 Belt-In-Oil petrol engines fitted in models across the Citroën-Peugeot range as well as shared platform models in the DS, Fiat, Opel, Toyota and Vauxhall ranges.

GAT5259 is specifically developed and designed to provide a secure method of counter holding the camshaft sprockets when securing and loosening camshaft sprocket bolts. The tool can be inserted in the open slots of the inlet and exhaust camshaft sprocket. The tool has a 1/2" square opening for any suitable wrench.

OE does not mention any use of this specific tool nor counter holding the sprocket when working on the engine, but experience in the field shows not doing so might transmit unnecessary forces to other tools or components of the engine.

Check our associated engine tools for any other required general engine work (timing belt replacement, crankshaft seal installer, camshaft locking, balance shaft alignment) on these types of engines.
