ARTICLE NUMBER: GAT6060A

DESCRIPTION: Hose Clip Pliers Tool Set

## INTRODUCTION

**GAT6060A** is a universal Hose Clip Pliers tool kit set specifically designed to be used on coolant hose clamps fitted on coolant and heater hoses typically found in the engine compartment of modern cars and vans. These hose clip pliers are extremely useful as they can access areas that are difficult to reach.

**GAT6063** has been replaced by **GAT6064** in tool kit **GAT6060A** in comparison to the content of **GAT6060**. **GAT6064** is a set of 2 hose release hooks used to free hoses from corroded fittings.

**GAT6061** is a flexible remote hose clip tool with a long reach of 600 mm to reach areas that are difficult to access and **GAT6062** is a clip plier that is angled to improve access in the compact engine.

We recommend adding **GAT6065A** and **GAT6068** to your range for a complete range of hose pliers.

**GAT6061** is equivalent to OE reference MOT.1448 and VAS 6340.
