

Replacement of 2167901 with 2167904

Textar will harmonise the reference 2167901 with 2167904.

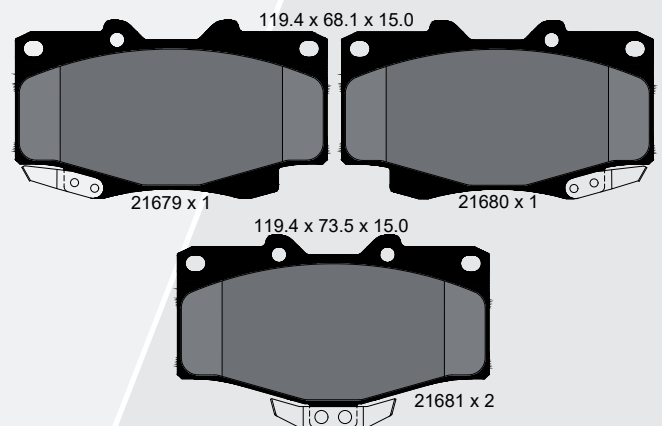

The only difference between the references was the friction material, therefore there will be no difficulties during assembly and operation.

The 01 was used globally and the 04 was only for Germany (we now consider the use of the 04 version globally). By doing this harmonisation, more vehicles are covered with just one reference (2167904).

2167901

2167904

As usual, the existing stock of 2167901 can be sold without any problems.
