

Circlip Tool

This tool is used to fit and remove circlips. Compared to conventional circlip pliers, the circlip does not need to be held under tension with physical effort. This makes installation significantly easier, even with large, heavy-duty

circlips.

- Mechanical tensioning without physical effort
- With 3/8" ratchet fitting
- Also suitable for large, heavy-duty circlips

Socket driver:

3/8

Number of contained variants:

12
