

Tightening torque

Centred around wheel bolt / Fig. no. 1

Stage 1 = 60 Nm

Stage 2 = 350 Nm

Centred around wheel bolt / Fig. no. 2

Stage 1 = 60 Nm

Stage 2 = 495 Nm

Please check tightening torques regularly !

Use a torque spanner to ensure that the specified torques are accurately maintained.

If the wheels were off, check and re-tighten the wheel nuts after about 200 km of driving.
