

Combination Rearlight Set

The wireless LED rearlights with magnet mount can be attached to the vehicle, machine or trailer quickly and easily. The 12 V transmitter and the CAN BUS adaptor for all light functions are integrated into the 7-pin plug to provide optimum usage time. This means there is no need for laborious cable installation,

which saves a lot of time and money. Tools are also not required. This ensures that the lights between vehicles and machines can be replaced in seconds. The lights are ideal for agriculture. Attention: The lights are not approved under German Road Traffic Licensing Regulations (StVZO)!

Mounting Type: Magnet Mount
Number of Poles: 7
Number of light functions: 5
Indicator Colour: Yellow
Battery: Li-Ion Rechargeable
 load status display
Battery capacity mAh: 2600
Burn Time h.: 8
Charging time h: 2,5
Registration Type: CE approved
Fulfils ECE norm: R148, R10

WxHxD mm: 108x110x58
WEEE weight g: 116
Version: Wireless
Light Function: with brake light (LED)
 with taillight (LED)
 with indicator (LED)
 with number plate light (LED)
 with reflector
Info: with plug
 with cigarette lighter plug
 with charge cable
