

# Strobe-type Beacon

The strobe-type beacon can be programmed with 10 strobe frequencies. These lights are characterised by their innovative and compact, flat design. The conventional rotating beacons on the market generally have a diameter of approx. 140 mm - 150 mm. Our new additions, on

the other hand, only have a diameter of up to 112 mm. They are also extremely flat at a height of 47 mm and are suitable for any requirement. With protection class IP67, they are also ideally suited for all uses on the vehicle.

<b>Height:</b>	51,9 mm	<b>Temperature range:</b>	-40 to +65 °C
<b>Housing Diameter:</b>	112 mm	<b>Material:</b>	PC (Polycarbonate)
<b>Registration Type:</b>	E-type checked	<b>Info:</b>	Electromagnetic Compatibility (EMC)
<b>Permissible maximum speed:</b>	180 km/h		with cigarette lighter plug with switch
<b>ECE norm:</b>	R65 R10
