

Replacement of MDB4059 with MDB2083

Mintex aims to streamline the designation of MDB4059 to MDB2083.

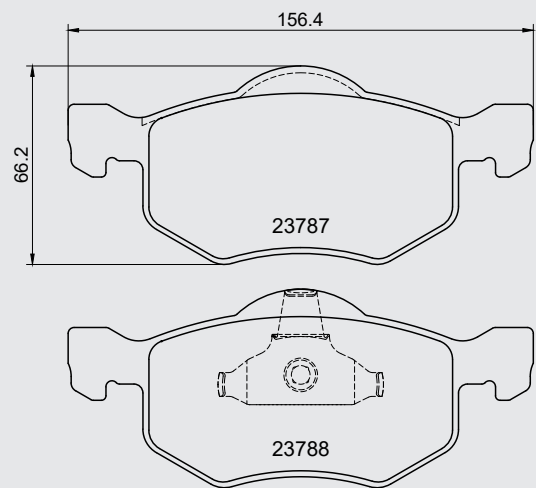

Given the identical outer dimensions of the brake pads we can ensure seamless assembly and operation. The difference between MDB2083 and MDB4059 is the MDB2083 thickness is slightly thinner.

This consolidation extends coverage to a broader range of vehicles under a singular reference, namely MDB2083 which is already covering applications of both part numbers.

MDB4059

MDB2083

The current inventory of MDB4059 can be effortlessly marketed and sold without any complications.
