

MEYLE SHOCK ABSORBERS FOR TESLA MODEL 3

# MAXIMUM COMFORT. MINIMAL EFFORT. OE-LEVEL PERFORMANCE

## Complete and precise fit

An extended piston rod thread, optimised bushing design and all the necessary installation fittings ensures quick and secure assembly – with no extra parts needed.

## Simple installation

The innovative C-shaped design allows for easy side installation and saves valuable time in the workshop.

## Comfort you can feel

Customised damping characteristics noticeably enhance comfort and stability - even for passengers in the rear seats. In addition, adjacent chassis components are better protected against wear.

## Durable and long-lasting

Comparison tests confirm that the MEYLE offering is stronger and more reliable thanks to its reinforced housing and 16 mm piston rod.

MEYLE no.: 70-26 540 0000/PD
