

CLEANER DPF AND EGR

OILS & CHEMICALS | 29008

Functions

The main function of this additive is to clean the EGR valve and the diesel particulate filter. This increases the life span of the soot filter and reduces soot formation. Particularly effective for urban traffic and short distances. **Not suitable for vehicles with the AdBlue® system (DEF)!**

Purpose

- cleaning the particle filter
- reduction of soot formation
- improvement of the CO₂-value

SYMPTOMS

- engine jerks
- rough idling
- bad exhaust emissions
- loss of power
- increased fuel consumption

REASONS FOR FAILURE

- coking of the EGR
- clogging of the DPF

CONSEQUENTIAL DAMAGES

- failure of the EGR valve, impossible to drive on
- DPF lamp lights up, possible to drive on limited
- DPF capacity full, impossible to drive on, high workshop costs

USAGE

- add to the diesel system before refueling
- depending on the vehicle usage, use every 2,500 to 5,000 km or after each service
- sufficient for 60 L to 80 L Diesel, overdosage harmless

i.a. fitting for universal
