This is a very high-quality mineral oil with proven performance. It is designed for the lubrication of four-stroke diesel cars, including diesel engines with direct injection such as Common Rail, HDI, CDI, etc. The use of high-quality components ensures that the oil has a great fluidity at low temperature and a stable viscosity at high temperatures. Its low ash formulation is combined with a high resistance to ageing.

## APPLICATIONS

This oil is used for most diesel engines, both normally aspirated and supercharged. It is particularly recommended for direct-injection diesel engines. Because of its excellent viscosity index it can be used all year round. High compatibility with biodiesel, based on extensive field trials.

## FEATURES

Total engine protection: engine protection and cleanliness
