

FORD TRANSIT THERMOSTAT REPLACEMENT

COOLING

Issue Date: 24/02/23

Issue Number: COTB0028

APPLICATION: Ford Transit/Tourneo MK8 2.0TDCi 2016>

APPLICABLE REFERENCES: FTK547

On the Ford Transit Mk8 2.0 TDCi 05/2016>07/2019, Ford have changed the design of the Thermostat, replacing it with the later 08/2019 applied Thermostat, equivalent to First Line reference FTK547.

The importance of this needs to be understood to minimise confusion and returns. The main differences are that the 05/2016>07/2019 Thermostat has a three bolt fixing and two sensors, whereas the later version from 08/2019 has one sensor and only has a two bolt fixing. See below.

To clarify, this is a Ford modification and you should now fit the 08/2019> Thermostat FTK547 to all applications from 05/2016>.

Thermostat & housing with two sensors and three bolt fixing.
OE REF: GK2Q-9K478 / 2037317

Thermostat & housing with one sensor and two bolt fixing.
OE REF: KK2Q-9K478-BA / 2347347

**NEW DESIGN
TO BE USED
ON ALL
APPLICATIONS
FROM 05/2016>**

Please note: On applications 05/2016>07/2019, there will be a spare loom connector, which is not needed.
