

PRODUCT RANGE

OIL AND WATER PUMPS FROM A SINGLE SOURCE
FOR DV4 / DV5 / DV6 PSA AND FORD GLOBAL ENGINES

FULFILLS THE EURO 4 / 5 / 6 EMISSION STANDARDS

OUR **HEART** BEATS FOR YOUR ENGINE.

MOTORSERVICE
RHEINMETALL AUTOMOTIVE

COMPREHENSIVE KNOW-HOW IN PUMP TECHNOLOGY POTENTIAL: 23 MILLION VEHICLES

Pierburg is regarded worldwide as a recognised specialist in innovative and pioneering pump technology and is one of the largest OE suppliers of oil pumps, water pumps and vacuum pumps. Decades of experience and expertise in development and manufacturing make Pierburg a globally recognised partner to car manufacturers.

Motorservice is expanding the Pierburg oil pump and water pump product range for the DV4, DV5 and DV6 global engines, thus consolidating its reputation as a leading supplier in the IAM.

Everything from one source

Due to the expansion of its product range, Motorservice is a full-service supplier of pumps for the DV engine family in accordance with the Euro standards 4, 5 and 6. Motorservice is also bringing the premium OE quality of the OEM Pierburg to the aftermarket.

The diesel global engines from the DV range are a joint development arising from the collaboration between the PSA group and Ford. PSA is bringing these diesel engines to the market with the designation ,HDi'.

Ford is producing these engines with the designation ,DLD engine'. Ford's sales name for the vehicles is Duratec TDCI.

Due to collaborations, the engines are being used in various passenger car models from Peugeot, Citroën, DS, Ford, Mazda, Mini, Suzuki, Toyota and Volvo.

To date, 23 million vehicles have been produced with these engines since the start of production in 2002. Motorservice customers are now better able to exploit this massive potential in the aftermarket with this product range expansion.
