ENGINE COMPONENTS AND SERVICE

Under the brand BF, Motorservice sells engine components of the highest quality which are designed for a long service life and efficient repairs.

Three million kilometres, daily load of 30 tonnes.

The drives of utility vehicles have to withstand particularly high stresses. The reliability of drive components is an absolute necessity to keep the total costs of ownership low.

Cross-brand offer

Our extensive product range includes spare parts suitable for engines from Volvo, Scania, Mercedes-Benz, MAN, Iveco, Deutz, DAF, Cummins and many other engine manufacturers.

Product range

- 01 Cylinder liner
- 02 Cylinder head
- 03 Rocker arm bearing block
- 04 Rocker arm bush
- 05 Rocker arm
- 06 Valve guide
- 07 Valve seat insert
- 08 Piston
- 09 Piston rings
- 10 Valve-spring + accessories
- 11 Intake/exhaust valves
- 12 Cylinder head bolt
- 13 Conrod bush
- 14 Connecting rod bearing
- 15 Oil injection jet
- 16 Fly wheel
- 17 Oil pump
- 18 Main bearing
- 19 Crankshaft
- 20 Connecting rod bolt
- 21 Connecting rod
- 22 Sealing ring
- 23 Crankcase
- 24 Camshaft bearing
- 25 Camshaft
- 26 Tappet
- 27 Valve push rod
- 28 Water pump

Crankshafts

Forged masterpieces for every torque

To ensure high quality standards, the forged BF crankshafts are produced with tools manufactured in-house. They are also subject to stringent checks. The dimensional accuracy ensures smooth running and therefore a long engine life.

Crankcase

Geometric precision and dimensional stability for optimal performance

As the housing for the drive mechanism and cooling jacket, the crankcase forms the central component of the engine. BF offers a comprehensive and high-quality portfolio of crankcases to provide quick, cost-effective solutions for repairing engines on utility vehicles.

Connecting rods

Robust force transmission

The high strain on the connecting rod due to tension, pressure and torsional forces requires connecting rod designs with high strength yet low weight. Connecting rods with a lower strength are an unnecessary risk for the engine. With the high-quality product range from Motorservice, you are always on the safe side.

Oil and water pumps

Perfect lubricant and coolant supply

Rheinmetall Automotive develops and supplies oil and water pumps to all leading engine manufacturers and has numerous patents. Building on this know-how, Motorservice offers pumps for a multitude of passenger car and utility vehicle applications. Make the most of this experience at a fair price/performance ratio.

Cylinder heads

Completed to your requirements

Motorservice boasts an extensive product portfolio of cylinder heads for passenger cars and utility vehicles. The cylinder heads are also available with pre-assembled valves and valve-springs according to requirements and for ease of repair.

Camshafts

Wear-resistant cams for long, powerful engine life

To withstand the high bending and torsion forces over the long term, the camshafts in the Motorservice product range have been designed to incorporate high strength properties. Camshafts may be cast or forged, depending on their intended purpose.

Control parts for camshafts

Temperature-resistant precision

The high-quality control parts from BF support the camshaft with its task of opening and closing the individual valves at a precise defined time with the exact stroke and in the defined sequence.

Oil coolers

Risk minimization during reconditioning

Together with the coolant system, the oil cooler ensures thermal equilibrium within the engine. Deposits of dirt particles in the fine lamellae can cause engine damage when oil coolers are reused – a high risk. Motorservice therefore offers oil coolers for a wide range of utility vehicle types.

Flywheels

Precision and weight for smooth engine running

BF flywheels are precision parts made from high-value grey cast iron or steel which efficiently reduce uneven running and vibration in the engine. This ensures that wear on the gear train is kept to a minimum.
