

## Replacement of BPD1159 with BPD2374

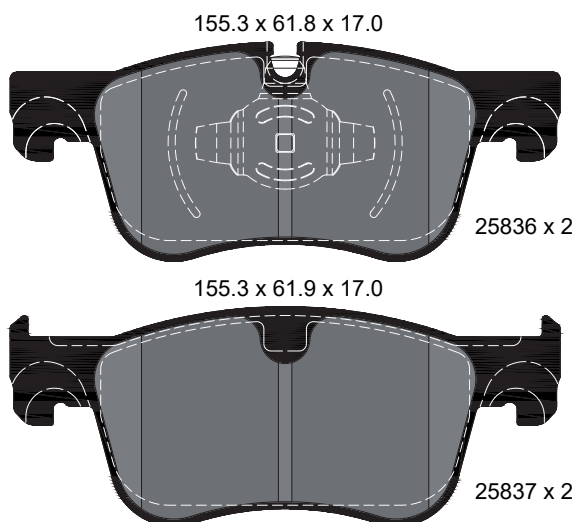

Bendix aims to streamline the designation of BPD1159 to BPD2374.

Given the identical outer dimensions of the brake pads we can ensure seamless assembly and operation.

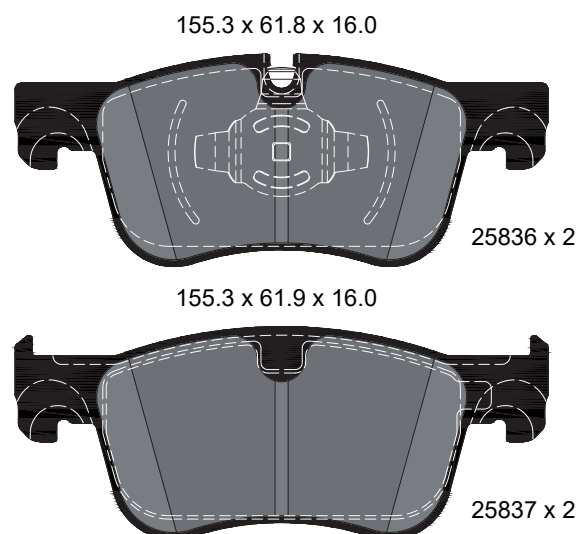

The difference between BPD2374 and BPD1159 is the BPD2374 thickness is slightly thinner, the chamfers will be modified from parallel to segment, and a foil cover will be applied to 25837 WVAs.

This harmonisation goes along with a replacement that was also implemented in the OES.

**BPD1159**

**BPD2374**

The current inventory of BPD1159 can be effortlessly marketed and sold without any complications.
