Hyundai IX35 Ring Gear Identification

Before fitting this clutch kit to a vehicle, it is important to check that the quantity of ring gear teeth on the new flywheel is the same as the flywheel that came off the car.

Up to 05/2014 the vehicle was fitted with a 110T ring gear pictured below:

ClutchPro Clutch kit: KHD24518

From 05/2014 onwards, the vehicle was fitted with a 132T Ring Gear:

ClutchPro Clutch kit: KHD24521

Both flywheels will bolt up to the crankshaft, however fitting the wrong flywheel will result in engine starting problems and possibly damage to the starter motor.
