

TSB-GM14 Holden Vectra Gearbox

To correctly identify the gearbox in a Holden Vectra the casing of the gearbox housing will be stamped with the model of the transmission.

The transmission model (F17/F18/F23) is stamped on the top of the gearbox (see picture below)

On F17/F18 gearboxes the gearstick reverse position is away from the driver.

On F23 gearboxes the gearstick reverse position is towards the driver.
