

## TSB - M105

### Confirmation of correct flywheel for ClutchPro kit KMI25006

When fitting ClutchPro kit KMI25006 fitters must be aware it will only suit a Dual Mass Flywheel (DMF). Incorrect clutch kit/flywheel combination will not allow the clutch to work correctly.

ClutchPro recommend changing the Dual Mass flywheel with any new clutch fitment. Failing to replace the DMF when replacing the clutch may void the warranty.
