

# CLUTCHTECH

## TSB-349

### Transmission Noise/Groan

Please note that this is a **Extra Heavy Duty Clutch** and has a higher torque spring centre in the friction disc to accommodate for extremely high torque engines. As a result of this spring centre, **additional transmission noise/groan** may be present at lower RPM deceleration or idle crawl speeds. The extent of these harmonics may vary depending on various other modifications to the vehicle and the configuration of the vehicle build.
