# JLM Petrol Hybrid Treatment

JLM Petrol Hybrid Treatment is a cleaner, protector and preserver, formulated to address the particular challenges that are faced by high-voltage hybrid vehicles, capable of electric-only propulsion. It guards against internal engine coking, lubricates and cleans the high-pressure fuel system, plus extends the petrol's usable lifespan.

## Benefits

- Formulated for the specific needs of petrol-electric vehicles
- Optimised for direct injection engines
- Prolongs fuel life, up to and including E10
- Cleans and lubricates the fuel system
- Guards against harmful deposits
- Ensures optimum fuel economy and emissions
- Improved Start/Stop Lubrication

## Direction of Use

As the Petrol Hybrid Treatment treats fuel to which it is dosed, JLM recommends that it is used at every fill-up. Shake well before use! And simply pour a full 250ml can of additive into the petrol fuel tank before filling up with fuel. One treatment is suitable for 30 to 50 litres of E0, E5 or E10 petrol but be careful not to overdose.

## Product information

**Art.-Nr.:** J03195

**Barcode:** 8718274351736

**UFI code:** 4VT8-508H-400Q-USDE

**Pack size:** 250ml

**Carton Size:** 12 Pieces

**Weight:** 286g per Unit

**HS code:** 38119000

**Excise Duty:** YES
