THE FIRST LINE OF DEFENCE  
FOR YOUR VEHICLE'S  
THROTTLE RESPONSE

**RESPONSE PLUS** THROTTLE CONTROL

## INCREASE THE THROTTLE RESPONSE IN YOUR VEHICLE

The **Response Plus Throttle Control** unit is a simple design with advanced program modifications made to give you an improved driving experience.

### INSTALLATION

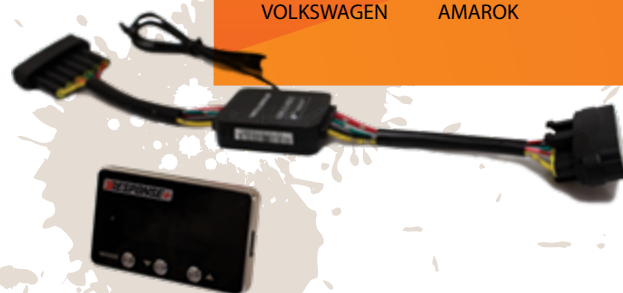

Easy to install, fitting between the ECU and accelerator pedal, once fitted **Response Plus Throttle Control** increases the signal between you putting your foot down and the vehicle taking off, giving you a greater response while driving.

The **Throttle Control** is a compact unit that is fixed to a drivers dash, allowing easy access to adjust settings. The unit will increase throttle response by adjusting the signal sent to the vehicles ECU and **eliminating throttle lag** on a vehicles accelerator, giving you **more power** quicker!

### CUSTOMISED SETTINGS

The **Response Plus Throttle Control** has four driving modes, each with customised settings that gives a driver the ability to finely tune their vehicles accelerator to suit their personal driving preferences.

The technology is suitable for both petrol and diesel vehicles.

### FITMENT GUIDE

### RESPONSE PLUS THROTTLE CONTROL
