# SAFETY DATA SHEET MOTAQUIP PREMIUM RED ANTIFREEZE & SUMMER COOLANT

SECTION 1: Identification of the substance/mixture and of the company/undertaking		
1.1. Product identifier		
Product name	MOTAQUIP PREMIUM RED ANTIFREEZE & SUMMER COOLANT	
Product number	VCA501,VCA520,VCA505,VCA5205,VCA502,VCA5205D4,VCA5205D1	
Internal identification	B16911, 16201, 16211, 16216, 16231, 16212, 16232, 16233	
1.2. Relevant identified uses o	f the substance or mixture and uses advised against	
Identified uses	Antifreeze liquid.	
Uses advised against	This product is not recommended for any industrial, professional or consumer use other than the identified uses stated above.	
1.3. Details of the supplier of the	he safety data sheet	
Supplier	MOTAQUIP LIMITED Unit B1, Luton Enterprise Park, Sundon Park Road, Luton Bedfordshire LU3 3GU	
1.4. Emergency telephone number		
Emergency telephone	Tel:	
SECTION 2: Hazards identification	ation	
2.1. Classification of the subst	ance or mixture	
Classification	Net Classified	
Physical hazards	Not Classified	
Health hazards	Acute Tox. 4 - H302 STOT RE 2 - H373	
Environmental hazards	Not Classified	
Classification (67/548/EEC or 1999/45/EC)	Xn;R22.	
2.2. Label elements		
Pictogram		
Signal word	Warning	
Hazard statements	H302 Harmful if swallowed. H373 May cause damage to organs through prolonged or repeated exposure if swallowed.	

Precautionary statements	<ul> <li>P260 Do not breathe vapour/spray.</li> <li>P264 Wash contaminated skin thoroughly after handling.</li> <li>P270 Do not eat, drink or smoke when using this product.</li> <li>P301+P310 IF SWALLOWED: Immediately call a POISON CENTER/doctor.</li> <li>P314 Get medical advice/attention if you feel unwell.</li> <li>P330 Rinse mouth.</li> <li>P501 Dispose of contents/container in accordance with national regulations.</li> <li>P102 Keep out of reach of children.</li> </ul>
Contains	ETHANEDIOL

#### 2.3. Other hazards

This product does not contain any substances classified as PBT or vPvB.

SECTION 3: Composition/information on ingredients			
3.2. Mixtures			
ETHANEDIOL		60-100	0%
CAS number: 107-21-1	EC number: 203-473-3	REACH registration number: 01- 2119456816-28-XXXX

STOT SE 3 - H335	
Aquatic Chronic 3 - H412	
The Full Text for all R-Phras	ses and Hazard Statements are Displayed in Section 16.
Composition comments	The data shown are in accordance with the latest EC Directives.
SECTION 4: First aid measu	ures
4.1. Description of first aid n	neasures
General information	First Aid responders should pay attention to self-protection and use the recommended protective clothing (chemical resistant gloves, splash protection). If potential for exposure exists refer to Section 8 for specific personal protective equipment.
Inhalation	Move affected person to fresh air at once. Get medical attention. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. When breathing i difficult, properly trained personnel may assist affected person by administering oxygen.
Ingestion	Do not induce vomiting. Remove affected person from source of contamination. Get medical attention immediately. If person is fully conscious give 1 cup or 8 ounces (240 ml) of water. If medical advice is delayed and if an adult has swallowed several ounces of chemical, then give 3-4 ounces (1/3-1/2 Cup) (90-120 ml) of hard liquor such as 80 proof whiskey. For children, give proportionally less liquor at a dose of 0.3 ounce (1 1/2 tsp.) (8 ml) liquor for eac 10 pounds of body weight, or 2 ml per kg body weight [e.g., 1.2 ounce (2 1/3 tbsp.) for a 40 pound child or 36 ml for an 18 kg child].
Skin contact	Remove contaminated clothing. Wash skin thoroughly with soap and water. Get medical attention if irritation persists after washing. Wash contaminated clothing before reuse. Destro contaminated leather items such as shoes, belts, and watchbands.
Eye contact	Flush eyes thoroughly with water for several minutes. Remove contact lenses after the initial 1-2 minutes and continue flushing for several additional minutes. If effects occur, consult a physician, preferably an ophthalmologist.
4.2. Most important symptor	ns and effects, both acute and delayed
General information	Aside from the information found under Description of first aid measures (above) and Indication of immediate medical attention and special treatment needed (below), no additional symptoms and effects are anticipated.

#### Notes for the doctor

Check section 3.2 to obtain percentage of ethylene glycol in this product, the following is based on 100% ethylene glycol content. If several ounces (60 - 100 ml) of ethylene glycol have been ingested, early administration of ethanol may counter the toxic effects (metabolic acidosis, renal damage). Consider hemodialysis or peritoneal dialysis & thiamine 100 mg plus pyridoxine 50 mg intravenously every 6 hours. If ethanol is used, a therapeutically effective blood concentration in the range of 100 - 150 mg/dl may be achieved by a rapid loading dose followed by a continuous intravenous infusion. Consult standard literature for details of treatment. 4-Methyl pyrazole (Antizol®) is an effective blocker of alcohol dehydrogenase and should be used in the treatment of ethylene glycol (EG), di- or triethylene glycol (DEG, TEG), ethylene glycol butyl ether (EGBE), or methanol intoxication if available. Fomepizole protocol (Brent, J. et al., New England Journal of Medicine, Feb. 8, 2001, 344:6, p. 424-9): loading dose 15 mg/kg intravenously, follow by bolus dose of 10 mg/kg every 12 hours; after 48 hours, increase bolus dose to 15 mg/kg every 12 hours. Continue fomepizole until serum methanol, EG, DEG, TEG or EGBE are undetectable. The signs and symptoms of poisoning include anion gap metabolic acidosis, CNS depression, renal tubular injury, and possible late stage cranial nerve involvement. Respiratory symptoms, including pulmonary edema, may be delayed. Persons receiving significant exposure should be observed 24-48 hours for signs of respiratory distress. In severe poisoning, respiratory support with mechanical ventilation and positive end expiratory pressure may be required. Maintain adequate ventilation and oxygenation of the patient. If lavage is performed, suggest endotracheal and/or esophageal control. Danger from lung aspiration must be weighed against toxicity when considering emptying the stomach. If burn is present, treat as any thermal burn, after decontamination. Treatment of exposure should be directed at the control of symptoms and the clinical condition of the patient.

#### SECTION 5: Firefighting measures

#### 5.1. Extinguishing media

·	
Suitable extinguishing media	The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog.
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
5.2. Special hazards arising from	om the substance or mixture
Specific hazards	Combustible Container may rupture from gas generation in a fire situation. Violent steam generation or eruption may occur upon application of direct water stream to hot liquids.
Hazardous combustion products	During a fire, smoke may contain the original material in addition to combustion products of varying composition which may be toxic and/or irritating. Combustion products may include and are not limited to: Carbon monoxide. Carbon dioxide. Nitrogen oxides.
5.3. Advice for firefighters	
Protective actions during firefighting	Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Fight advanced or massive fires from safe distance or protected location. For massive fire in cargo area, use unmanned hose holder or monitor nozzles, if possible. If not, withdraw and let fire burn out. Withdraw immediately in case of rising sound from venting safety device or any discoloration of tanks due to fire. Do not use water jet as an extinguisher, as this will spread the fire. If a leak or spill has not ignited, use water spray to disperse vapours and protect men stopping the leak. Extinguishing waters may present a risk of damage to the environmental, collect and dispose of as hazardous waste, in accordance with local legislation.
Special protective equipment for firefighters	Wear positive-pressure self-contained breathing apparatus (SCBA) and protective fire fighting clothing (includes fire fighting helmet, coat, trousers, boots, and gloves). If protective equipment is not available or not used, fight fire from a protected location or safe distance.

#### **SECTION 6: Accidental release measures**

6.1. Personal precautions, protective equipment and emergency procedures		
Personal precautions	Isolate area. Keep unnecessary and unprotected personnel from entering the area. Refer to Section 7, Handling, for additional precautionary measures. Use appropriate safety equipment. For additional information, refer to Section 8, Exposure Controls and Personal Protection. No smoking, sparks, flames or other sources of ignition near spillage. Avoid inhalation of vapours and contact with skin and eyes.	
6.2. Environmental precautions		
Environmental precautions	Avoid from entering into soil, ditches, sewers, waterways and/or groundwater. See Section 12, Ecological Information.	
6.3. Methods and material for c	containment and cleaning up	
Methods for cleaning up	Contain spilled material if possible. Containers with collected spillage must be properly labelled with correct contents and hazard symbol. Small Spillages: Absorb with materials such as: Cat litter. Sand. Sawdust. Zorb-all®. Hazorb®. Large spills: Dike area to contain spill. Pump into suitable and properly labeled containers. See Section 13, Disposal Considerations, for additional information.	
6.4. Reference to other section	S	
Reference to other sections	For personal protection, see Section 8. See Section 11 for additional information on health hazards. For waste disposal, see Section 13.	
SECTION 7: Handling and stor	age	
7.1. Precautions for safe handli	ing	
Usage precautions	Avoid spilling. Do not swallow. Do not handle broken packages without protective equipment. Good personal hygiene procedures should be implemented. Wash hands and any other contaminated areas of the body with soap and water before leaving the work site. Avoid contact with skin and eyes.	
7.2. Conditions for safe storage	e, including any incompatibilities	
Storage precautions	Store in tightly-closed, original container in a dry, cool and well-ventilated place. Keep away from food, drink and animal feeding stuffs. Keep only in the original container.	
7.3. Specific end use(s)		
Specific end use(s)	The identified uses for this product are detailed in Section 1.2.	
SECTION 8: Exposure Controls	s/personal protection	
8.1. Control parameters	· ·	
Occupational exposure limits ETHANEDIOL		
Long-term exposure limit (8-hour TWA): WEL 52 mg/m <sup>3</sup> 20 ppm Short-term exposure limit (15-minute): WEL 104 mg/m3 40 ppm vapour Sk Long-term exposure limit (8-hour TWA): WEL 10 mg/m <sup>3</sup> particulate		
SODIUM BENZOATE		
No exposure limit value known.		
TOLYLTRIAZOLE		
No exposure limit value known.		
DISODIUM MONOMOLYBDATE DIHYDRATE		

Long-term exposure limit (8-hour TWA): WEL 5 mg/m<sup>3</sup>, as Mo. inhalable dust Short-term exposure limit (15-minute): WEL 10 mg/m<sup>3</sup> inhalable dust as Mo

#### DENATONIUM BENZOATE

No exposure limit value known.

WEL = Workplace Exposure Limit Sk = Can be absorbed through skin.

Ingredient comments WEL = Workplace Exposure Limits		
	ETHANEDIOL (CAS: 107-21-1)

8.2. Exposure controls	
Protective equipment	
Appropriate engineering controls	Provide adequate general and local exhaust ventilation. Observe any occupational exposure limits for the product or ingredients.
Eye/face protection	Use safety glasses (with side shields), consistent with EN 166 or equivalent. If there is a potential for exposure to particles which could cause eye discomfort, wear chemical goggles (goggles consistent with EN 166 or equivalent). If exposure causes eye discomfort, use a full-face respirator.
Hand protection	Use chemical resistant gloves classified under Standard EN374: Protective gloves against chemicals and micro-organisms. If hands are cut or scratched, use gloves chemically resistant to this material even for brief exposures. Use gloves with insulation for thermal protection (EN 407), when needed. Examples of preferred glove barrier materials include: Butyl rubber. Natural rubber ("latex"). Neoprene. Nitrile/butadiene rubber ("nitrile" or "NBR"). Polyethylene. Ethyl vinyl alcohol laminate ("EVAL"). Polyvinyl alcohol ("PVA"). Polyvinyl chloride ("PVC" or "vinyl"). When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended. NOTICE: The selection of a specific glove for a particular application and duration of use in a workplace should also take into account all relevant workplace factors such as, but not limited to: Other chemicals which may be handled, physical requirements (cut/puncture protection, dexterity, thermal protection), potential body reactions to glove materials, as well as the instructions/specifications provided by the glove supplier.
Other skin and body protection	Wear appropriate clothing to prevent any possibility of liquid contact and repeated or prolonged vapour contact. Use protective clothing chemically resistant to this material. Selection of specific items such as face shield, boots, apron, or full body suit will depend on the task. When handling hot material, protect skin from thermal burns as well as from skin absorption.

Hygiene measures	Do not smoke in work area. Wash hands at the end of each work shift and before eating, smoking and using the toilet. Promptly remove any clothing that becomes contaminated. Wash promptly with soap and water if skin becomes contaminated. Use appropriate skin cream to prevent drying of skin. Do not eat, drink or smoke when using this product.
Respiratory protection	Respiratory protection should be worn when there is a potential to exceed the exposure limit requirements or guidelines. If there are no applicable exposure limit requirements or guidelines, wear respiratory protection when adverse effects, such as respiratory irritation or discomfort have been experienced, or where indicated by your risk assessment process. For most conditions no respiratory protection should be needed; however, if discomfort is experienced, use an approved air-purifying respirator. Use the following CE approved air-purifying respirator: Organic vapor cartridge with a particulate pre-filter, type AP2.
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

### SECTION 9: Physical and Chemical Properties

### 9.1. Information on basic physical and chemical properties

Appearance	Clear liquid.
Colour	Reddish. Pink.
Odour	Almost odourless.
рН	pH (diluted solution): 8.0 to 8.6 @ 50% water solution
Initial boiling point and range	>170°C @ 760 mm Hg
Flash point	117°C CC (Closed cup).
Relative density	1.115 to 1.130 @ 20°C

## 9.2. Other information

SECTION	10: Stability	and reactivity
---------	---------------	----------------

10.1. Reactivity		
Reactivity	Stable at normal ambient temperatures and when used as recommended.	
10.2. Chemical stability		
Stability	Stable at normal ambient temperatures.	
10.3. Possibility of hazardous	reactions	
Possibility of hazardous reactions	Will not polymerise.	
10.4. Conditions to avoid		
Conditions to avoid	Exposure to elevated temperatures can cause product to decompose. Generation of gas during decomposition can cause pressure in closed systems.	
10.5. Incompatible materials		
Materials to avoid	Strong acids. Strong oxidising agents. Strong alkalis.	
10.6. Hazardous decomposition products		
Hazardous decomposition products	Decomposition products depend upon temperature, air supply and the presence of other materials. Decomposition products can include and are not limited to: Aldehydes. Ethers. Alcohols.	

SECTION 11: Toxicological information	
11.1. Information on toxicolog	jcal effects
Toxicological effects	The product is not expected to be toxic to aquatic organisms.
Other health effects	There is no evidence that the product can cause cancer.
Acute toxicity - oral	
Notes (oral LD₅₀)	Harmful if swallowed.
ATE oral (mg/kg)	540.31
Specific target organ toxicity -	- repeated exposure
STOT - repeated exposure	May cause damage to organs through prolonged or repeated exposure.
General information	To the best of our knowledge the chemical, physical and toxicological properties have not been thoroughly investigated.
Inhalation	Unlikely to be hazardous by inhalation because of the low vapour pressure of the product at ambient temperature. Vapour may irritate respiratory system/lungs.
Ingestion	Harmful: possible risk of irreversible effects if swallowed. Headache. Nausea, vomiting. There may be soreness and redness of the mouth and throat.
Skin contact	Prolonged and frequent contact may cause redness and irritation. Not a skin sensitiser.
Eye contact	May cause eye irritation.
Acute and chronic health hazards	May cause damage to kidneys and liver through prolonged or repeated exposure (oral).
Route of entry	Ingestion.
Medical symptoms	Headache. Nausea, vomiting.
Toxicological information on ingredients	

Toxicological information on ingredients.

ETHANEDIOL

Acute toxicity - oral	
Acute toxicity oral (LD₅₀ mg/kg)	7,712.0
Species	Rat
Notes (oral LD∞)	Acute oral toxicity is expected to be moderate in humans eventhough animals test results would suggest a low toxicity. Ingestion of approximately 100ml has caused death in humans. Ingestion may cause nausea, vomiting, abdominal discomfort or diarrhea. Excessive exposure may cause central nervous system effects, cardiopulmonary effects and kidney failure.
ATE oral (mg/kg)	500.0
Acute toxicity - dermal Acute toxicity dermal (LD₅o mg/kg)	3,501.0
Species	Mouse
ATE dermal (mg/kg)	3,501.0

Acute toxicity - inhalation		
Acute toxicity inhalation (LC∞ vapours mg/l)	2.6	
Species	Rat	
Notes (inhalation LC₅₀)	At room temperature exposure to vapour is minimal due to low volatility. With good ventilation single exposure is not expected to cause adverse effect. If the product is heated or the working area has poor ventilation, vapour/mist may accumulate and cause respiratory irritation and symptoms such as headache and nausea.	
Skin corrosion/irritation		
Animal data	Not irritating. Rabbit	
Serious eye damage/irritat	ion	
Serious eye damage/irritation	Not irritating. Rabbit	
Respiratory sensitisation		
Respiratory sensitisation	Guinea pig: Not sensitising.	
Skin sensitisation		
Skin sensitisation	- Guinea pig: Not sensitising.	
Germ cell mutagenicity		
Genotoxicity - in vitro	Negative.	
Genotoxicity - in vivo	Negative.	
Carcinogenicity		
Carcinogenicity	The current toxicological kowledge allows to not classify the product as a carcinogen.	
Reproductive toxicity		
Reproductive toxicity - fertility	Ingestion of large amounts has been shown to interfere with reproduction in animals.	
Specific target organ toxicity - repeated exposure		
STOT - repeated exposure	Observations in humans include: Nystagmus (involuntary eye movement). In animals effects have been reported on the following organs: kidneys and liver. NOAEL 150 mg/kg/day, Oral, Rat	
Target organs	Kidneys	
Inhalation	At room temperature, exposure to vapor is minimal due to low volatility. With good ventilation, single exposure is not expected to cause adverse effects. If material is heated or areas are poorly ventilated, vapor/mist may accumulate and cause respiratory irritation and symptoms such as headache and nausea.	

Ingestion	Oral toxicity is expected to be moderate in humans due to ethylene glycol even though tests with animals show a lower degree of toxicity. Ingestion of quantities (approximately 65 mL (2 oz.) for diethylene glycol or 100 mL (3 oz.) for ethylene glycol) has caused death in humans. May cause nausea and vomiting. May cause abdominal discomfort or diarrhea. Excessive exposure may cause central nervous system effects, cardiopulmonary effects (metabolic acidosis), and kidney failure. For Ethylene glycol: Lethal Dose, Human, adult 100 ml LD50, rat, male and female 7,712 mg/kg.
Skin contact	Prolonged skin contact is unlikely to result in absorption of harmful amounts. Repeated skin exposure to large quantities may result in absorption of harmful amounts. Massive contact with damaged skin or of material sufficiently hot to burn skin may result in absorption of potentially lethal amounts.
Eye contact	May cause temporary eye irritation.
Route of entry	Ingestion.
Target organs	Kidneys Liver
DISODIUM MONOMOLYBDATE DIHYDRATE	

Acute toxicity - oral	
Acute toxicity oral (LD₅₀ mg/kg)	2,733.0
Species	Rat
ATE oral (mg/kg)	2,733.0
Acute toxicity - dermal	
Acute toxicity dermal (LD₅₀ mg/kg)	2,001.0
Species	Rat
ATE dermal (mg/kg)	2,001.0
Skin corrosion/irritation	
Animal data	Not irritating.
Serious eye damage/irritatio	on
Serious eye	Not irritating.
damage/irritation	
Respiratory sensitisation	
Respiratory sensitisation	Data lacking.
Skin sensitisation	
Skin sensitisation	Not sensitising.
Germ cell mutagenicity	
Genotoxicity - in vitro	Negative.
Genotoxicity - in vivo	Negative.
Carcinogonicity	

Acute toxicity - oral

### Carcinogenicity

	Carcinogenicity	Based on available data the classification criteria are not met.
	Reproductive toxicity	
	Reproductive toxicity fertility	- Data lacking.
	Specific target organ	toxicity - single exposure
	STOT - single expos	<b>re</b> Based on available data the classification criteria are not met.
	Specific target organ	oxicity - repeated exposure
	STOT - repeated exp	osure Data lacking.
	Aspiration hazard	
	Aspiration hazard	Not considered an aspiration hazard.
<b>SECTION 1</b>	2: Ecological Informat	n
Ecotoxicity	ar	e product is not expected to be hazardous to the environment. The product components not classified as environmentally hazardous. However, large or frequent spills may have cardous effects on the environment.
12.1. Toxicit	ty	
Toxicity	Tł	e product is not expected to be toxic to aquatic organisms.
Ecological in	nformation on ingredie	ts.
		ETHANEDIOL
	Toxicity	Product not classified as dangerous to aquatic organisms.
	Acute toxicity - fish	LC50, 96 hours, 96 hours: 72860 mg/l, Pimephales promelas (Fat-head Minnow)
	Acute toxicity - aquat invertebrates	c EC₅₀, 48 hours, 48 hours: > 100 mg/l, Daphnia magna
	Acute toxicity - aquat plants	c EC₅₀, 96 hours, 96 hours: 6500 - 13000 mg/l, Selenastrum capricornutum
	Acute toxicity - microorganisms	EC20, 30 min, 30 minutes: > 1995 mg/l, Activated sludge
	Chronic toxicity - fish life stage	early NOEC, 7 days: 15380 mg/l, Pimephales promelas (Fat-head Minnow)
	Chronic toxicity - aqu invertebrates	atic NOEC, 7 days: 8590 mg/l, Ceriodaphnia Sp.
		DISODIUM MONOMOLYBDATE DIHYDRATE
	Acute toxicity - fish	LC₅₀, 96 hours: 1536-1718 mg/l, Pimephales promelas (Fat-head Minnow)
	Acute toxicity - aquat invertebrates	c LC₅₀, 48 hours: 330.1 mg/l, Daphnia magna
	Acute toxicity - aquat plants	c EC₅₀, Effect on growth., 72 hours: 840 mg/l, Pseudokirchneriella subcapitata

Acute toxicity -	
microorganisms	

EC50, 3 hours: 216.5 mg/l, as Mo, Activated sludge

#### 12.2. Persistence and degradability

**Persistence and degradability** The product is biodegradable but it must not be discharged into drains without permission from the authorities. The product is degraded completely by photochemical oxidation.

Ecological information on ingredients.

#### ETHANEDIOL

Persistence and degradability	The product is biodegradable.
Biodegradation	<ul> <li>Degradation (%) 90 - 100%: 10 days</li> <li>Passes OECD test(s) for ready biodegradability. Material is ultimately</li> <li>biodegradable (reaches &gt; 70% biodegradation in OECD test(s) for inherent</li> <li>biodegradability).</li> </ul>

#### DISODIUM MONOMOLYBDATE DIHYDRATE

Persistence and	
degradability	

#### 12.3. Bioaccumulative potential

Bioaccumulative potential The product does not contain any substances expected to be bioaccumulating.

Not applicable.

Ecological information on ingredients.

#### ETHANEDIOL

Bioaccumulative potential	Not potentially bioaccumulative
Partition coefficient	log Pow: -1.36

#### DISODIUM MONOMOLYBDATE DIHYDRATE

Bioaccumulative potential Low potential.

12.4. Mobility in soil

Mobility

The product is soluble in water. Volatilization from natural bodies of water or moist soil is not expected to be an important fate process.

#### Ecological information on ingredients.

#### ETHANEDIOL

MobilityThe product is soluble in water. Volatilization from natural bodies of water or moist<br/>soil is not expected to be an important fate process.
