

VCF176

Makes/ Models

Filter Type: Standard

BMW

5 Series E34 (1988->1996)

Difficulty: Hard
Time (Approx) 1 hour +

Cabin Filter Location

1. The Cabin Filter can be found behind the Glove compartment and the side of the centre console
2. Remove the door of the glove compartment and the upholstery panel to the side of it.
3. Remove the upper wall of the glove compartment and then unscrew the ventilation collection pipe situated behind it.
4. Remove the electronic device situated behind the filter chamber.
5. Next, loosen the screw on the cover and turn the lock 90 degrees to the left to remove the filter and gain access to the Cabin Filter.
