

## IntelliSens App – First TPMS Service for Smartphone, Tablet and PC

### Start now and enter a new World

With the IntelliSens App Tire Pressure Monitoring Systems (TPMS) are even easier and faster diagnosed and configured. Everything that is needed in a repair shop is an Android smartphone, Tablet or a Windows PC with the IntelliSens App and the HC1000.

Wireless and automatic updates for new vehicle models available in the market.

Two processors provide higher speed and reliability.

**Innovation by Huf**

Communication takes place between the IntelliSens App on your smartphone, tablet or PC and the sensor via the HC1000.

### Benefits for shops

- Automatic updates for new vehicles
- Easy installation and use
- Coverage of all typical OE-Sensors in the market
- Fastest data processing by latest technologies
- Programs Huf IntelliSens and also other universal sensors
- Relearn procedures
- History function including cloning
- Easy print of service protocols
- Menu available in English, Dutch, Swedish, German, Italian, Spanish

IntelliSens App offers direct support assistance via TeamViewer in case of any questions.
