## STARTER MOTORS & ALTERNATORS

**IMPORTANT PLEASE READ THE INFORMATION BELOW BEFORE FITTING THIS PART AS THERE ARE KNOWN ISSUES WHICH WILL RESULT IN THE PREMATURE FAILURE OF THE UNIT AND MAY INVALIDATE YOUR WARRANTY**

**THE VEHICLE THAT THIS ALTERNATOR IS FITTED TO MAY REQUIRE ADDITIONAL PARTS**

Prior to fitting this alternator please ensure that the water pipes and pipe connectors are the same size as the alternator you are replacing.

Some models of the VW Touareg have been fitted with either a Hitachi or Delphi alternator which have different size pipes and connectors. If the pipes on the vehicle are a different size you will need to source the relevant adapters and 'o' rings to replace the pipe fittings.

The B+ terminal between the alternator and the battery will also need replacing due the difference in the routing of the cable.

**Any alternator that has been fitted without the relevant modifications being carried out will not be accepted for return. Proof of purchase of the relevant parts will be required when returning this alternator if it has been fitted.**

We have been advised that the following VW OE part numbers will be required when carrying out this modification:

- ⇒ 07Z121132L = Adapter
- ⇒ 079903237 = O-Ring
- ⇒ 07Z971349B = Wiring Harness

\*The above part numbers have been provided as information only as a guide to what part number you may require, it is your responsibility to ensure that you obtain the correct parts that you require. Autoelectro cannot be held responsible for the use of the above part numbers.
