

## 40-1333FULLKIT

IJS GROUP products should be replaced by a qualified automotive installer. This information is provided for reference purposes only. Always consult the manufacturer's specifications.

IJS GROUP supplies a complete camshaft kit for Stellantis engines. The kit includes all necessary components; camshafts, bolts, seals, and other hardware, and features reinforced camshafts with advanced heat treatment, ensuring maximum durability and reliability.

### FULLKIT

- Complete kit for Stellantis engines.
- Includes all necessary components: camshafts, bolts, seals, and other hardware.
- Camshafts are reinforced with advanced heat treatment.
- Ensures maximum durability and reliability.
- Designed as an all-in-one solution for timing system replacement or repair.

### CHAINS

- Reinforcements applied only to references with recurring quality or wear issues (currently 30–40 references).
- Lubrication holes optimized to enhance durability (developed by IJS, later adopted by FIAT and others).
- Use of high fatigue-resistance materials.
- Thermochemical and surface treatments.
- Geometric design optimization.
- Objective: maximize timing system reliability and longevity.

### CAMSHAFT

- Camshafts included in the kit are reinforced.
- Advanced heat treatment ensures durability and reliability.
- Fully integrated with all kit components for complete replacement without compatibility issues.
- Laser welding and individual inspection of each camshaft.
