PRODUCT INFORMATION

PACKAGING CHANGE

UTILITY VEHICLE ENGINE BEARING PACKAGING HAS CHANGED

From May 2022, there have been changes to the packaging for some utility vehicle bearing sets.

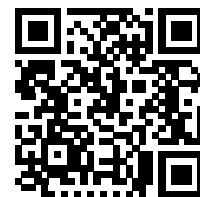

The backing card, on which the engine bearings are sealed with film, has been changed from blue with Kolbenschmidt logo to white.

This is a purely visual change that allows greater flexibility in procurement of materials. Nothing about the packaging or the products has changed in terms of function and quality.

NOTE

You can check whether the products you have received are genuine Kolbenschmidt products using the authenticity check in our Motorservice app (QR code).
