## KOLBENSCHMIDT (KS) ENGINE KIT SETS

### WITH SEALING RINGS

In accordance with the worldwide company standardization, MS Motorservice Brazil informs that all engine kit sets with wet cylinder liners sold in the Aftermarket with Kolbenschmidt (KS) brand will include sealing rings.

Wet cylinder liners, i.e. cooled directly by the engine coolant, need to be inserted into the engine block along with the sealing rings.

Therefore, this new supply configuration of engine kit sets, offers to repairers an easier engine reconditioning and fitting.

We inform that, in case of kit sets commercialized in two versions, with and without sealing rings, the configuration without sealing rings has been discontinued, remaining just the version with sealing rings and its corresponding part number.

Kit sets that were only commercialized without sealing rings, are now commercialized with sealing rings and under new part numbers according to the shared table.

The kit sets in the old configuration (without sealing rings) remaining in our customers stock can be sold normally, but it is advised to use our spare sealing rings, according to table below.

In case of new updates in supply configuration of engine kit sets with wet cylinder liners, you will be informed through the Product Information (PI).

Manufacturer	Status	From	To	Sealing rings part number
Cummins	Part number changed	40256960	40256962	62803
		40330960	40330962	62803
