UNIQUE VARIETY

The 1,500-m² spare parts store from Hans Küppers GmbH & Co. KG contains over 24,000 rare parts, stored across a number of levels. For classic car enthusiasts, seeing the fascinating contents of this room is like taking a journey through time, back to the pioneering age of the motor vehicle.

Hans Küppers GmbH & Co. KG came into being when it purchased a large number of spare parts for vehicles made between 1900 and 1985 from a clear-out of a Pierburg spare parts store. Now, the company's portfolio focuses on throttle valves, throttle units and throttle bearings, plus pumps and valves.

Looking for rare parts?

How about some spare parts for a Glas, Goliath or Carter, for example? Anything that is no longer available can be made – and we can do that to the original historical specifications.

A strong partnership

Motorservice offers its partners rare spare parts for both modern classic and classic cars. After all, this spare parts specialist is a first port of call for both German and international motor vehicle enthusiasts.

But take a look at the immense range of spare parts for yourself – here are a few examples.
