EMKA Diesel System Cleaner

Diesel system cleaner and system protection

1. APPLICATION

EMKA Diesel System Cleaner, with its special active ingredients, dissolves residues and deposits throughout the system. It ensures the lubricating effect of the injection pump with low-sulfur diesel and can also be used in new common rail and unit injector engines. It also protects against corrosion and prevents deposits throughout the injection system, thereby reducing wear and ensuring better engine performance and lower fuel consumption.

Application:

- 1) Pour into the fuel tank before refueling.
- 2) The product works while driving.

One can is sufficient for approximately 60 liters of diesel fuel.
For larger tanks, add 50 ml per 10 liters.

2. YOUR BENEFIT

- Works while driving.
- Can be used in all diesel engines.
- Prevents deposits throughout the injection system.
- Cleans the entire system, from the fuel tank to the combustion chambers.

Can be used with:

- Suitable for all diesel engines and miscible with all diesel fuels.
