EMKA DPF Purifier

Soot reduction and cleaning additive

1. APPLICATION

Emka DPF Purifier is a high-performance additive for reducing soot emissions, which also lowers exhaust emissions and improves engine performance through the purified fuel system. It is used in all diesel engines without an automatic additive dosing system and is miscible with all diesel fuels. Regular use keeps the diesel particulate filter clean and prevents damage or even the need to replace the filter.

Use:

Approximately every 2,000 km, pour one can into the tank immediately before filling up. The contents are sufficient for 40-60 liters of diesel fuel; the product works while driving.

2. YOUR BENEFIT

- Works while driving.
- Cleans the entire fuel system.
- Optimizes engine performance and thus fuel consumption.

Can be used with:

- Compatible with all petrol and diesel engines.

3. PACKAGING

CONTENTS	ART.NO.
12 x 300ml can	8930002
