## EMKA Engine Flush

Oil system cleaner

### 1. APPLICATION

Emka Engine Flush is a cleaning additive suitable for use in all gasoline and diesel engines with and without turbochargers. It dissolves deposits and residues on piston rings, hydraulic tappets, valve train, and engine casing walls, i.e., all aggressive residues created during the combustion process are removed from the entire engine oil circuit. Highly effective additives reliably protect the engine during the cleaning process.

The dissolved dirt and deposits are removed from the engine with the used oil during an oil change!

#### Use:

- 1) Add to the oil circuit before every oil change.
- 2) Let the engine idle for approximately 15-20 minutes.
- 3) Change the oil and filter according to the manufacturer's specifications.

One can is sufficient for up to 5 liters of oil. For larger quantities, add 60 ml per liter. The product can be disposed of with the drained used oil.

### 2. YOUR BENEFIT

- Improved compression, better performance.
- Deposits and residues are permanently removed.
- Fuel and oil consumption, as well as wear, are reduced.
- Reduced exhaust emissions, increasing the service life of exhaust gas purification systems.

#### Can be used with:

- Miscible with all mineral and synthetic engine oils.

### 3. PACKAGING

CONTENTS	ART.NO.
12 x 300ml can	8910001
